Hello Szymon,

You are learning fast, keep it up

Thanks,  
Vitor Scarpa2 years ago (06/29/2021) by [Szymon Turkiewicz \(Tester\)](#)

I already know what was my mistake. Instead of port 443 I wrote 433 ...

2 years ago (06/29/2021) by [Szymon Turkiewicz \(Tester\)](#)

I followed exactly these steps last time. Will try again tonight.

2 years ago (06/29/2021) by [Vitor Scarpa \(TTL\)](#)

Hello Szymon,

Thanks for making the changes. However there are still a few mistakes in the report, please fix the mistakes listed below:

- Please verify that your SSL proxying settings are correct and upload another Charles log

1. Open Charles > Click on Proxy > Select SSL Proxying Settings
2. Remove the previous SSL proxy from both sections (Include and exclude)
3. Click on Add button under "Include"
4. Type \* in the host and type 443 in the port
5. Save
6. Reproduce your issue again
7. Upload the new Charles log to your report

Thanks,  
Vitor Scarpa2 years ago (06/28/2021) by [Szymon Turkiewicz \(Tester\)](#)

Done!

2 years ago (06/28/2021) by [Vitor Scarpa \(TTL\)](#)

Hello Szymon,

Thanks for reporting this issue, but you need to correct some mistakes.  
To find out what the mistakes are, please review these points in the article below: 3.7, 11.1, 11.3  
<https://www.utest.com/courses/bug-report-information-fields>

After you find the mistakes, fix them by clicking Actions > Edit Issue and click on the "Confirm all requested info is added" after you finished.

Thanks,  
Vitor Scarpa
